Post of Research Assistant

Project on "Healthy lifestyle practices and their association with selected nutritional parameters among the school children in Sri Lanka (1st phase-Western province-Gampaha district- Gampaha educational zone)"

Under -HSDP budget

Background of the project: School children comprise 20% of the total population of Sri Lanka. They are the future working force that determines the country's prospective productivity. Hence the level of nutrition of the school children is regarded as a vital aspect to be concerned. Nutritional parameters influence the school performances of the children. Furthermore the unfavorable nutritional parameters among them cause problems for the next generation as well.

Duties and responsibilities:
